## PROFESSIONAL SUMMARY

Highly-skilled machine learning, deep learning with extensive experience in commercial and customer-focused data science. Drives business value and decision-making through strategic analyses and recommendations. Passionate about engaging new technologies and tools for continuous innovation. Meticulous Data Scientist accomplished in compiling, transforming and analyzing complex information through software. Expert in machine learning and large dataset management. Demonstrated success in identifying relationships and building solutions to business problems. Hardworking and passionate job seeker with strong organizational skills eager to secure entry-level machine learning and AI engineer position. Ready to help team achieve company goals.

## WORK HISTORY

### MACHINE LEARNING & DEEP LEARNING, 02/2021 - 04/2023

#### *Online bootcamps*

- Developing predictive models for sales forecasting, customer churn, and customer lifetime value.
- Creating recommendation systems for e-commerce platforms and personalized marketing campaigns.
- Creating of chatbot that simulates human-like conversations with users via chat to answer user questions with instant messages.
- developing a machine learning model for a financial services company that could accurately predict loan defaulters with 95% accuracy

## **DEEP LEARNING & AI ENGINEER, 05/2023 - Current**

### **Online bootcamps**

- Develop Automate trading bot, that can automatic buy and sell at the best time
- Image Classification with Convolutional Neural Networks
- Generative Adversarial Network (GAN) Art Generation
- Customer Segmentation for E-commerce Personalization
- Line follower robot using opencv

---

## **SKILLS**

- Intelligence gathering
- Machine learning
- Analytical modelling
- Data mining
- Forecasting and planning
- Data extraction
- Data collection and analysis
- Statistical analysis

---

## **EDUCATION**

**FreeCodeCamp, Online bootcamps, Online bootcamps, Nigeria, 02/2019 - 02/2020**

### **Python & Website Developer**

- Reviewed, validated and automated testing to improve code quality.
- Learned multiple coding languages and development frameworks to serve needs of changing development program.
- Engaged clients to understand software design requirements and advise on best-fit options.
- Collaborated with other developers to identify and alleviate software bugs.
- Developed processes governing software testing, validation and defect resolution.
- Produced clean, error-free code in line with internal quality standards.
- Built simulation systems to model designs, informing development decisions.

---

**Udemy, Online bootcamps, Online bootcamps, 04/2020 - 10/2020**

### **Data scientist**

- I acquire a great experience with using the computer application and computer window
- I majorly specialized on
- Full Stack Web development, | Online  
With great team work, we execute projects at ease
- I have learn how to work with other developers of various specialization  
Solving technical problems and creating new innovation to the world of big data space
- Used SQL to query databases, working with relational and non-relational database systems
- Formulated and implemented robust data management strategies from testing through to reporting
- Implemented new data science models, tools and technologies to elevate business performance
- Created actionable and measurable KPIs and success metrics to facilitate strategic reporting and evaluation

---

## INTERESTS

A full stack web and blockchain developer. I got my excellent coding skills from the best bootcamps in the world and have worked on complex blockchain projects. Hire me

---

## ADDITIONAL INFORMATION

- ABOUT ME
- I am Dare Timileyin,a Website developer, Machine learning and Ai Engineer.I got my excellent coding skill from the best bootcamps school: Udemy, FreeCodeCamp,Coursera and i have worked with various machine learning and deep learning algorithms and build neural network from scratch.
